### THE UNESCO ROUTE

📍 27 km 🏔️ Easy 🕒 2h10 + visits

The bicycle is a wonderful machine for going back in time! We are far from the stereotypes of the Borinage: the city of Mons has changed a lot and this is evident in its urban planning and its plethora of museums. From the Grand-Place, in a few pedal strokes, we reach the belfry and the Mundaneum by bike. Let us continue our discovery of the city's heritage by cycling along the RAVeL to the Grand-Hornu, which is deliberately isolated from the world. We feel the historical significance of these places, as if the bicycle allowed us to immerse ourselves, to take the time to observe and feel them....
